CloudFerro Provides Access to Airbus Services via the NoR Portfolio

AIRBUS

Thanks to a new collaboration with CloudFerro, Airbus' services for processing high-resolution satellite imagery are now available through the Network of Resources!

This addition **expands the NoR Portfolio with more services making use of high-resolution data in the cloud suitable for a wide range of applications**, such as environmental monitoring, urban planning, and infrastructure.

As part of this offer, **OneAtlas Analytics services are also available**, which combine VHR imagery with artificial intelligence and cloud computing to deliver automated, scalable insights.

Discover the new Airbus offer, delivered via CloudFerro, now accessible on the [NoR](#).

Big Data from Space 2025

We were thrilled to participate in the Big Data from Space 2025 conference in Riga, Latvia, an exceptional gathering of the Earth observation and space data community.

The conference brought together key stakeholders from industry, academia, EU institutions, and governmental entities to explore the evolving landscape of space, big data, and related emerging technologies.

As part of the ESA-SatCen-JRC joint booth programme, the Network of Resources had the opportunity to deliver engaging demo presentations, showcasing the NoR Portal and Portfolio.

Did you know?

You can easily discover relevant services in the NoR Portfolio by filtering based on **geographical coverage** and **temporal period**. These filters help you identify which NoR Providers offer services that can deliver the data you need for your projects. Click on the 'Access it here' button on the Portfolio landing page to explore all available options!

Season's Greetings

on behalf of all the NoR providers!
