Welcome CS GROUP Romania – TAO to the NoR Portfolio of Services

We are pleased to announce that CS GROUP Romania is now part of the Network of Resources Portfolio of Services, providing advanced Earth Observation (EO) data processing capabilities through its TAO (Tool Augmentation by user enhancements and Orchestration) Platform.

As part of its NoR offering, CS GROUP Romania provides access to TAO, a lightweight and flexible framework enabling users to design, execute, and scale EO processing workflows. The platform supports the integration of widely used toolboxes such as SNAP, Orfeo Toolbox, and GDAL, allowing users to build customised processing pipelines and incorporate their own modules. TAO supports scalable execution through virtual machines or Kubernetes clusters, and offers user-friendly interfaces alongside standard OGC APIs for seamless integration.

With the addition of CS GROUP Romania, the NoR Portfolio further strengthens its capabilities in EO data processing and analytics, offering users powerful and flexible tools to develop and deploy advanced EO applications.

CS GROUP Romania and the TAO Platform can be accessed by visiting the [NoR Portfolio](#).

A new phase for the NoR

NoR is now entering a new phase, reorienting its sponsorship focus towards projects supporting ESA's strongly user-driven 'Earth Action Initiative', which are primarily driven by ESA-certified contract projects.

We will keep the community informed as NoR evolves and if sponsorship opportunities for non-ESA projects become available again.

Pricing Wizard: Multi-Provider Support

The NoR Pricing Wizard now supports multi-provider calculations, allowing users to estimate pricing for services from more than one provider at a time.

This makes it easier to plan the use of resources and compare options across the NoR catalogue, streamlining the process of finding the right combination of EO services, tools and processing solutions.

Explore the [NoR Portfolio](#) to know more.

Please note that sponsorship is currently open to ESA projects only.
